Great art, fun puzzles!. Fun game, short and sweet and satisfying when you finish it! Good fuse of logic and weirdness.. This game is not too bad. The controls to me where hard, and the graphics where just okay. I give this a 60/100.. Loved replaying this gem, oringinally purchased each episode waiting patiently for each release was thrilled to see it on Steam

The game is full of humour from a very witty developer.

Hoping this isn't the last we see of our gardener Duncan and his wheelbarrows. Really good point and click game with some cynical, offensive humor that actually got me quite a few times. I'd throw out warnings for some bad sex worker jokes in the first part, but it improves significantly from there.. I like doing something with hands in VR. It's what's making it real. There are a few cool things you can do. Like lighting up a molotov cocktail and putting enemies on fire. Or drinking some strange drink called 'serum'. And it's a natural part of the game you'll love to use. I am not a fan of cartoonish visuals, so this side of the game lost me. Anyway it's a cool bow shooter.

Nice point&click and hidden-object game.
Long. Good graphics. Interesting puzzles.. This is without doubt an idle game. There have been a little to no focus on gameplay and hitboxes. Cannot recommend to people that is looking for a game to play.
This game can only be recommended to people that want easy achievements.. Recently got addicted to Escape the Room games, thanks to VR. Loved the game. A few of the puzzles had me scratching my head for a bit. Was a lot of fun and im excited for the next chapter. Took about 30-45min to beat. Similar to Abode in length. Its fun and interesting but kind of difficult to learn. Also feeding the colonists is really annoying.

Edit: feeding colonists is a lot easier now, highly recomend game.. In 2015 the developer promised an update that will let you skip the extremely long introduction. I don't think even EA would take this long to introduce that.. Nice game, pour that it isn't this popular!. The game is surprisingly playable with just keyboard controls. However, the final boss is complete bs on keyboard.. It's alright I guess, didn't use much of it.. The funnest gun in the game for 99 Cents? SIgn Me up
